Position: Software Engineer (Front-End)

Hours: 40 hours/week (contract)

Are you ready to take on an entrepreneurial challenge? Are you looking to work in a fast paced environment with leading edge technologies? Are you able to showcase flexibility, creativity and thrive both independently and in a small team?

About Us

Kickir Studios is a startup with a dynamic work culture and looking for talented software developers to join the team. We streamline software design and development for early-stage companies (e.g. [PopInShop](#), [SpeSoHealth](#), [Jin+Ja](#), etc...). We work closely with our clients and take responsibility of creating, maintaining and managing end-to-end software solutions. Kickir Studios was founded at the Wharton School, University of Pennsylvania and is a member of the Wharton Venture Initiation Program.

Responsibilities

- Work directly with one or more startups in a range of different industries (eCommerce, healthcare, travel, education, etc...)
- Interpret the client's requirements into software design
- Implement your designs as the primary front-end developer on the project
- Work closely with the founder / CEO of Kickir Studios in an agile and iterative development lifecycle - your code will go out the door within the first 2 weeks

Qualifications

- Bachelors in Software Engineering, CS or related technical discipline
- 1-3 years in front-end and client-side development for web / mobile
- Java, C, C++, PHP, HTML, CSS, Javascript, jQuery (one or more)
- Knowledgeable in one or more CMS/web application frameworks (Wordpress, Drupal, Joomla, etc...)
- User Interface design (Photoshop, Illustrator) is a plus
- Strong communication skills
- Strong organizational capabilities

Please submit your resume to roopak@kickir.com
